Recommendations & Guidelines

Allow material to reach room temperature prior to printing. Keep out of direct sunlight unless being used with pigmented or UV inks. Varnishing / Lamination will increase life & protection, immediate lamination is possible, allow 24 hours dry time before water based varnished is applied. Print can be heat sealed after 24 hours. Print is water resistant after 24 hours. Product has very high resistance to 'cracking' on edges when stretched on Canvas frames. Product offers high white, low texture surface for high quality photographic output.

** Matt black ink is not fully water resistant so handle with care any images with dense matt black ink use.

** To improve handling with matt black images use of a spray guard is recommended.
